PROFESSIONAL EXPERIENCE

Web Intern
Let's Grow More | 2022

- Overcame challenges by employing creative solutions, highlighting adaptability.
- Completed 3 challenging projects within a time span of 2 months.

PROJECTS

Food Booking and ordering website
HTML, CSS, Javascript, Django, AJAX

- Conceptualized and developed a comprehensive food ordering application using Django, catering to user-friendly online food delivery.
- Incorporated user authentication and session management to ensure secure and personalized interactions for customers and restaurants.
- Implemented search and filtering functionalities, allowing users to easily discover restaurants, cuisines, and dishes based on preferences.

Real time chat Application
HTML, CSS, Javascript, Django, AJAX,SqlLite

- Developed a real-time chat application using the Django framework, integrating WebSocket technology for instant messaging functionality.
- Implemented user authentication and authorization features to ensure secure access to the chat platform.
- Utilized Django Channels to establish bi-directional communication between clients and the server, enabling seamless real-time updates.
- Leveraged JavaScript and AJAX to enhance user interactions and enable dynamic content loading without page refresh
